**2020 *ECLIPSE CROSS***

## BOLD STYLE FOR THE URBAN EXPLORER

Innovation and intention live side by side in the adventurous design and engineering of the Mitsubishi Eclipse Cross.

With its Dynamic Shield front-end look, coupe-inspired profile and distinctive wedge styling at the rear, Eclipse Cross makes a spirited statement, coming and going. Inside, it offers you an extensive array of comforts and amenities, including an available power panoramic sunroof.

Satisfy your passion for exploring with exceptional engineering that allows you to

take on rugged backroads, city streets or winding highways with ease. The technological centrepiece is standard Super All-Wheel Control (S-AWC), the world's most advanced all-wheel control system. S-AWC uses dynamic feedback from the powertrain, steering and brake systems, and a network of onboard sensors to control torque distribution to each wheel, thereby generating optimal traction in all kinds of driving situations and in virtually any weather.

# EXPERIENCE THE FREEDOM OF CONTROL

Eclipse Cross is equipped with standard Super All-Wheel Control (S-AWC) featuring three driver selectable modes for superior performance and driving confidence. **AUTO** offers well-balanced 4-wheel drive performance, resulting in enhanced fuel efficiency, traction, high-speed stability and predictable handling based on road and driving conditions; **SNOW** provides improved traction and stability specifically for snow-covered or slippery roads; and **GRAVEL** delivers maximum traction on coarser roads or whenever you might find yourself stuck in a rough patch of off-road terrain.

For more information on S-AWC, visit [mitsubishi-motors.ca](http://mitsubishi-motors.ca).

## EXCEPTIONAL COMFORT INFUSED WITH RALLY-BRED DNA

Eclipse Cross cradles you in modern comforts and puts leading edge performance technologies at your immediate beck and call.

Standard heated front seats, available heated rear seats and an available heated steering wheel make cold-weather driving more enjoyable than it deserves to be. To further elevate your experience, Eclipse Cross comes with standard Android Auto™<sup>1</sup> and Apple CarPlay<sup>2</sup>, plus SiriusXM® Radio with 3 months of complimentary service. Want more? Get it in the Eclipse Cross GT S-AWC, with standard Head-Up Display (HUD) and 710-watt Rockford

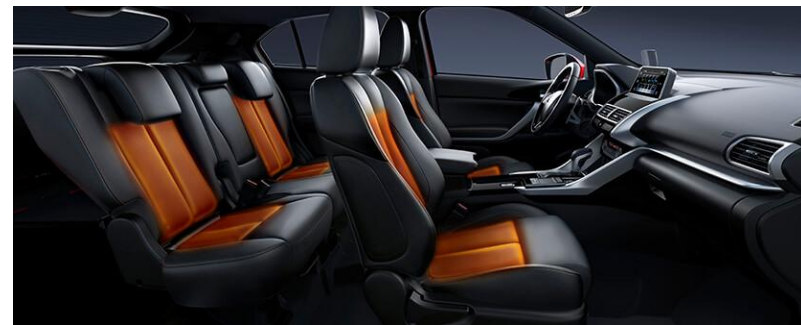

Fosgate® Punch® display audio system featuring 9 speakers, including a 10" subwoofer.

But don't let these comforts and amenities fool you: the Eclipse Cross is infused with the rally-bred DNA of a true Mitsubishi Motors SUV. It's there in the standard 152-horsepower turbocharged engine, the advanced Continuously Variable Transmission (CVT) and its available, racing-inspired paddle shifters. All these technologies work together seamlessly to deliver exhilarating performance, pocketbook-friendly fuel economy and a truly engaged driving experience.

## SAFETY & PROTECTION YOU CAN COUNT ON

Safety surrounds you in the Eclipse Cross, thanks to Mitsubishi Motors' systematic approach to collision protection and avoidance. This includes extensive use of high tensile strength steel and Reinforced Impact Safety Evolution (RISE) engineering; together they create a vehicle body that safely absorbs and deflects crash energy, while providing a rigid, protective structure around you.

### Rear Cross Traffic Alert (RCTA)<sup>†</sup>

RCTA detects a vehicle approaching from the side while you're backing up. It alerts you with flashing warning lights on both side mirrors, a buzzer that sounds in the cabin and a warning message that appears in the instrument cluster.

### Blind Spot Warning (BSW)<sup>†</sup>

BSW alerts you when a vehicle is in or approaching your blind spot. When a vehicle in the next lane is travelling at the same speed or faster in the detection areas, a warning light illuminates on the corresponding side mirror. If you switch the turn signal on, the warning light on the corresponding mirror will blink and the system will beep three times to alert you that it is unsafe to change lanes.

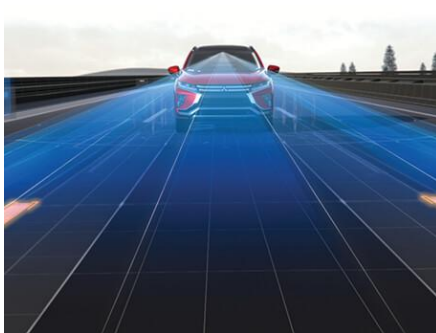

### Forward Collision Mitigation (FCM)<sup>†</sup>

FCM utilizes both laser radar and camera technology to determine if a frontal collision is imminent. If so, it warns you with audible and visual signals, and automatically applies moderate to emergency braking to reduce the severity of the collision and, if possible, prevent the collision altogether.

### Adaptive Cruise Control (ACC)<sup>†</sup>

ACC uses radar technology to judge distances between you and the vehicle ahead, helping maintain a safe distance. If that vehicle moves out of your lane or goes beyond your set speed, the system will resume your set speed.

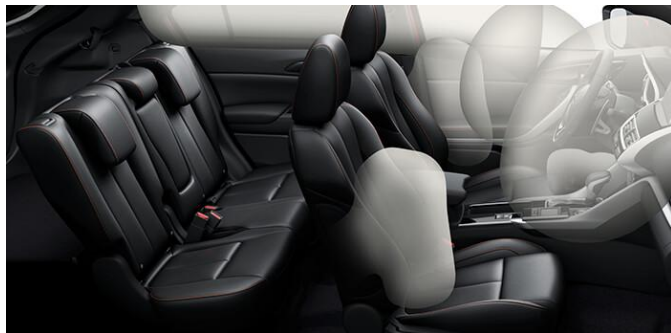

### Lane Departure Warning (LDW)<sup>†</sup>

LDW uses an onboard camera to monitor lane position in front of the vehicle, providing audible and visual alerts if it detects your vehicle leaving the lane unintentionally.

### Multi View Camera System (MVCS)<sup>†</sup>

MVCS creates a virtual 360° panoramic bird's-eye view of the area surrounding the vehicle, allowing you to navigate tight driveways, look out for objects in blind spots, and park with confidence and safety.

### 7 Standard Airbags

Help protect Eclipse Cross occupants in a variety of collision situations. Protection includes dual front airbags, front seat-mounted side-impact airbags, side-impact curtain airbags (front & rear) and a driver's knee airbag.
